ICS Evaluation Preview

The purpose of international educational credential preview (IECP) is for your personal information and preliminary evaluation of your chances of getting a visa to work, to immigrate or to study in Canada.

General Evaluation Report

Our most popular type of report (also known as a document-by-document assessment).

The General Evaluation Report describes the education completed and suggests the comparable level in Canada for each credential. This type of report is the one most commonly required by employers and immigration officials.

Secondary School Comprehensive Evaluation Report

The Secondary School Comprehensive Evaluation Report describes the education completed outside Canada at a level comparable to the senior secondary school level in Canada and suggests the comparable level in Canada. This report also provides a list of all courses/subjects completed at a level comparable to the grade 12 level in Canada with the comparable credit values and grades.

Postsecondary Comprehensive Evaluation Report

The Postsecondary Comprehensive Evaluation Report describes the postsecondary education completed, suggests the comparable level in Canada for each credential and provides a list of courses/subjects completed with **both** the comparable credit value **and** grade.

This type of report is most commonly requested by those applying to postsecondary institutions who need to provide evidence of specific postsecondary courses.

Note: If you are unsure which type of Evaluation Report would be best for you, we would suggest that you request a General Evaluation Report. If you later find that you require a Secondary School or Postsecondary Comprehensive Evaluation Report, you can request an upgrade.

Secondary and Postsecondary Comprehensive Report

The Secondary and Postsecondary Comprehensive Evaluation Report describes the education completed, suggests the comparable level in Canada for each credential and provides lists of senior secondary and postsecondary courses/subjects completed with the comparable credit values and grades.

* A "**credential**" is one partially or fully completed educational program leading to a certificate, diploma or degree. Each certificate, diploma or degree program you have taken is a separate credential. Course work or credit completed at two or more different institutions and applied (or transferred) towards a credential is not considered to be one credential. Course work completed at each institution will be considered as a separate credential. If you wish to have more than one credential evaluated, please include the additional fee. Additional credential evaluation requests that are received at a later date will be assessed the full fee.
